printhive

green / sustainable / recyclable **eco**

Never has it been more important for businesses and consumers alike to be more environmentally conscious, think about our energy usage and think of ways to reduce our carbon footprint and how our actions affect the world around us.

Our green, sustainable print solutions are a range of planet friendly alternatives to the traditional printed papers and boards. The range of large format boards and roll media are printed using HP Latex water-based ink technology which is UL Ecologo and Greenguard gold certified.

The range includes responsibly sourced papers, pvc-free alternatives and even material made from 100% recycled water bottles!

Many of the products are fully recyclable at the end of their life and can be recycled and repurposed to start their life again as an eco-friendly product.

If you have a project or would like to discuss your environmentally friendly print options then give us a call on 01934 707050 or email us sales@theprinthive.co.uk to see what we can do for you.
